Las hojas de este álbum destinadas para su uso en las Asturias se componen de 170 ejemplares cada una, distribuidos en 12 columnas de 10 sellos. Tras haberlo analizado, hemos adoptado un sistema de numeración, que creemos adecuado. Ayuda y simplifica las cosas del dueño cuando sus sellos, numerados que son, son los sellos, de manera que, v.g. el ejemplar situado en la intersección de la columna 2 con la fila 7 sea designado por el número 37 y el que se halla en el cruce de la columna 12 con la fila 8 designe el número 148. Inversamente se procederá para situar un ejemplar en un que habrá de situarse.

En cuanto a la Fila 0 agregar 10 unidades más para numerar el ejemplar o sellos en el número que aparece para situarlo.
